## **Sport and Recreation Plan Community Feedback**

DATE SENT RECD	Item	Description	Name	Position	Organisations	Officer comment	Recommendation
30/11/2018	Feedback on item 10 (priority project listing) - Installation of permanent soccer goals.	Concerned that the installation of permanent soccer goals has been changed from high priority to low priority. Concerned about the process by which the change occurred and that Broome Soccer Association were not consulted about the change.	Tom Hulse	Secretary	Broome Soccer Association	The need for permanent soccer goals at BRAC was identified by the consultant as a high priority.	That the submission be noted and the soccer goals returned to a high priority project. Minimal financial impact as a low cost item.
30/11/2018	Feedback on item 10 (priority project listing) - Installation of permanent soccer goals.	As a Broome resident I would like to put forth my support in the installation of permanent football goals at the BRAC facility as a high priority for the safety of players which include children, officials and spectators.  We should be able to include all sports that hold a high participation rate and one that has such a high organisational involvement of volunteers.	Marika Daniele	Member of public	Member of public	The need for permanent soccer goals at BRAC was identified by the consultant as a high priority.	That the submission be noted and the soccer goals returned to a high priority project. Minimal financial impact as a low cost item.
30/11/2018	Feedback on item 10 (priority project listing) - Installation of permanent soccer goals.	The portable goals the club currently use are a health and safety risk to the hundreds of community members who participate in soccer in Broome.  My daughter has benefitted greatly from the opportunities provided by Broome Soccer Association to participate in soccer, develop her coaching skills and travel to Perth representing Broome and to Singapore representing Country WA. I cringe every time I watch the goals being carried across the pitch by young players and teenage coaches and ask the Shire to make the installation of permanent soccer goals at BRAC a high priority.	Laura Handscombe	Member of public	Member of public	The need for permanent soccer goals at BRAC was identified by the consultant as a high priority.	That the submission be noted and the soccer goals returned to a high priority project. Minimal financial impact as a low cost item.
30/11/2018	Feedback on item 10 (priority project listing) - Installation of permanent soccer goals.	As a young athlete, an active member of the Broome Soccer Association and a long standing player and volunteer coach, and member of the Broome Talent Development Program I support Broome Soccer Association in its request for permanent football goal posts to be erected at the BRAC facility. I have personally carried the current goals about twice a week for the past ten years and the physical strain is demanding and the process is unsafe. There have been numerous occasions during which a friend of mine or myself have hurt themselves trying to carry the heavy equipment across the oval. I urge the Shire of Broome to consider making permanent goal posts a high priority.	Ulani Hayter Otaola	Member	Broome Soccer Association	The need for permanent soccer goals at BRAC was identified by the consultant as a high priority.	That the submission be noted and the soccer goals returned to a high priority project. Minimal financial impact as a low cost item.
30/11/2018	Feedback on item 10 (priority project listing) - Installation of permanent soccer goals.	The installation of permanent football (soccer) goals at the BRAC facility is a high priority for safety of players, officials and spectators, regardless of other benefits such as volunteer load and longevity of equipment.  Under the FIFA Laws of the Game, transportable goals do not meet the requirements of Law 1 unless they are firmly secured to the ground. Given the hardness of the fields at BRAC this is virtually impossible.	Jamie Harnwell	Head of Development	Football West	The need for permanent soccer goals at BRAC was identified by the consultant as a high priority.	That the submission be noted and the soccer goals returned to a high priority project. Minimal financial impact as a low cost item.

30/11/2018	Feedback on item 10 (priority project listing) - Installation of permanent soccer goals.	Decision to move permanent soccer goals to a low priority is unjustified and should be reconsidered. The process through which an individual Councillor reaches conclusions used to justify amendment lacks transparency and details, undermines the costly engagement of private consultancy used in planning and denies procedural fairness for right of reply.  Soccer had the largest mini roos program in Australia in 2016 and is one of the top four sports in Broome.  All other major codes have fixed goals with the exception of soccer. Portable goals are expensive, susceptible to damage and pose significant risk to health when transporting.	Michael Dawson	President	Broome Soccer Association	The need for permanent soccer goals at BRAC was identified by the consultant as a high priority.	That the submission be noted and the soccer goals returned to a high priority project. Minimal financial impact as a low cost item.
30/11/2018	Feedback on item 10 (priority project listing) - Broome Basketball Association	Replacing the flooring of the indoor courts, installation of air-conditioning should be a high priority. In the wet season basketball competition the heat can be a major health and safety risk to all participants as the level of humidity is so high.	Sean Williams	Member of public	Member of public	Installation of an indoor basketball court is listed by the Consultants as a high priority.	That the submission be noted.
	1.3.19 Future Pavilion and viewing areas to oval.	Development of a stronger club atmosphere of the Australian Rules Football clubs in Broome. I think this would be most effectively achieved through the construction of club houses for the hosting of social club events, such as presentations nights. This would give the club members and players a place to call their own, creating a sense of pride and belonging within the club itself.				The need for a clubhouse at the BRAC fields was identified by the consultant as a low priority.	That the submission be noted.
	Feedback on coaching support.	I believe the Shire of Broome should have further educating the coaches from all sports in Broome. Funding them so that they can complete adequate coaching courses would assist them in their roles with their respective clubs. As the level of coaching increased so to would the quality of junior participants ultimately leading to an increase in the level of athletes being produced in the Broome sporting scene.				The Shire of Broome offers funding for community development initiatives through its Community Sponsorship program. Clubs are encouraged to apply.	That the submission be noted.
30/11/2018	Feedback on purpose built facility for dance, gymnastics and circus.	Supports inclusion of a purpose built facility for dance, gymnastics or circus as a high priority. These activities cater to hundreds of families within the Shire and have given many people in Broome experience of success on a national stage and should be fostered to provide more opportunities.	Clancy McDowell	Member of public	Member of public		That the submission is noted.
30/11/2018	Feedback on Independent club.	Needs to include more reference to Sandfly Circus needs beyond simply recognising them, and include a plan to guarantee future certainly. Highlights the risks associated with operating Theatre Kimberley out of BRAC. Organisation has similar membership to Squash club but unable to use air conditioning. Storage is also an issue particularly when centre is used as a cyclone shelter. Civic Centre is not an appropriate venue. An indoor basketball court would compromise the Sandfly Circus program. Would require own purpose built facility and has potential to grow similar to Broome Performing Arts Co. PCYC could be an option but would not be able to colocate with basketball. Suggests moving all basketball to BRAC and setting up Theatre Kimberley at PCYC.	Meredith Bell	Artistic Director	Theatre Kimberley	Exploring opportunities to link Kimberley Theatre to PCYC and move basketball programs to BRAC has merit. The Department of Local Government, Sport and Cultural Industries and State Sporting Associations are responsible for developing coaches.	That the submission is noted and a meeting is organised between Sam and Aletta at a suitable time.
30/11/2018	Feedback on item 10 (priority project listing) - Installation of permanent soccer goals.	Supportive of including fixed permanent soccer goals as a high priority as safety of our children and anyone else should be the first thing on the radar.	Vanessa Klunder	Parent	Member of public	The need for permanent soccer goals at BRAC was identified by the consultant as a high priority.	That the submission be noted and the soccer goals returned to a high priority project. Minimal financial impact as a low cost item.

30/11/2018	General feedback on plan.	Notes that the plan focuses on infrastructure but does not incorporate reference to programs or people (volunteers, coaches, officials) and list of organisations that do exist.  Clearer reference to independent clubs so they understand the need to self-fund. These clubs will require business cases.  No direction on provision of future allocation of public open space.  Opportunity to include other clubs projects in their own right.  Gymnastics and PCYC. Would prefer Shire to support PCYC hub.	Kristina Dickman	Regional Manager Kimberley.	Department of Local Government, Sport and Cultural Industries.	Reference to sport specific clubs is covered in Category Three Sport Specific Clubs. Reference to Club Development is covered as part of the existing Philosophy and Rationale.	That the submission be noted.
30/11/2018	1.3.19 Future Pavilion and viewing areas to oval.  9.2.2 Haynes Oval Lighting upgrade to 150 lux.	Suggests a focus on amenities at BRAC including increased shade, remodelling of change rooms, increased spectator banks at Father McMahon Sports Field. A scoping study for the possible inclusion of clubrooms and grandstand in between the BRAC fields could be undertaken by Football if required. Would also support a steering committee to look into this.  Indicates that the West Kimberley Football League and West Australian Football Commission are able to manage parking and view the lightning upgrade as a higher priority than any parking and pavilion upgrades.	Eamon Rice	Kimberley Development Officer	West Australian Football Commission	The need for shade and improved amenities was identified by the consultant as a medium and low priorities.  The need for upgraded LUX levels at Haynes Oval was identified by the consultant as a high priority.	That the submission be noted.  That the submission be noted and lightning upgrading at Hayne Oval returned to a high priority replacing upgrades to Haynes Oval.
	Feedback on item 10 (priority project listing) - Broome Basketball Association	Supports the installation of floodlights to Nipper Roe Sports Field as a high priority.  Suggestions for facility needs for short to medium term include: Adjustable backboard systems, improved ventilation and air conditioning, resurface flooring in stadium, install spectator seating.  Suggestions for facility needs for long term include additional indoor courts, sprung floor in stadium.	Grant Astles	Vice President	Broome Basketball Association	Ventilation is often commented upon as a critical need for the stadium. Adjustable backboards would provide better and safer environment for junior training and development. Spectator seating is budgeted in 2017/18. The resurfacing of the stadium floor is listed as a high priority and is in the Corporate Business Plan. Large fans to assist air movement would be beneficial for both sport and the centre as the emergency shelter. The need for additional courts is considered to be a potential need, but outside of the 10 year scope of this plan and is noted in 9.3.4.	Include the adjustable backboards and fans as high priority items. Retain the resurfacing of the indoor stadium courts as a high priority item and maintain the potential for additional indoor courts into the future beyond the scope of the plan.
30/11/2018	1.3.10 Squash courts/multipurpose space	Supportive of the squash court/multipurpose space being a high priority project.	Craig Starcevich	Committee member	Broome Squash Club	Building three new squash courts is listed as a high priority in the Sport and Recreation Plan.	That the submission be noted and the squash/multipurpose space remain as a high priority item.
30/11/2018	Pearl Coast Gymnastics considerations	Disappointed that the needs for gymnastics was not included in the report. They have a large member base and are facing some uncertainty in regards to their current location and usability/cost implications into the future.	Ken Goatley	President	Pearl Coast Gymnastics Club	The gymnastics club was invited to be a part of the consultation a number of times through phone and email. Due to the lack of response the need as identified in this submission was not considered in this report.  The need to find a home for circus is mentioned in 9.3.6. This section states that as sport grows there will need to be consideration for an alternative home for circus as the current operation of the group out of BRAC is restrictive to their activities as well as other sports.  Due to the uncertainty and unknown level of security in their current location at the	That item 9.3.6 be amended to include the need to assist gymnastics in finding a location to operate from in a facility that better fits their needs. Potential for co location in a separate external facility.

29/11/2018	Feedback on item 10 (priority project listing) - Installation of permanent soccer goals.	As a rate payer and parent of two children, 12yo and 13yo, I urge the Shire to reinstate permanent soccer goals as a priority. Soccer is the first sporting love of both children (one male, one female) and desperately want to get out and practice the game, however, there is no access to soccer goals to make it the real deal.	Bethanie Nicholls	Parent	N/A	high school, it is suggested that investigations be undertaken in a similar method to the circus to look for potential co - location in an alternate/private facility.  The need for permanent soccer goals at BRAC was identified by the consultant as a high priority.	That the submission be noted and the soccer goals returned to a high priority project. Minimal financial impact as a low cost item.
29/11/2018	Feedback on item 10 (priority project listing) - Installation of permanent soccer goals.	I've been made aware that the priority for permanent soccer goals have been moved from high priority to a low priority, I think this should be reinstated to a high priority.	Joshua May	Previous player	N/A	The need for permanent soccer goals at BRAC was identified by the consultant as a high priority.	That the submission be noted and the soccer goals returned to a high priority project. Minimal financial impact as a low cost item.
29/11/2018	Feedback on item 10 (priority project listing) - Installation of permanent soccer goals.	Please reinstate permanent soccer goals in Broome as high priority for the shire. I have been a member of the BSA since arriving in Broome 5 years ago. I was the secretary for 2 years. I saw the dedicated efforts of volunteers at BSA which help make the incredible junior soccer participation rates in Broome possible. There is also lots of youth and men's and women's soccer participation. I saw the difficulties associated with portable goals. They are expensive, delicate and easily damaged. It should be a priority for the Shire to support the BSA and soccer in Broome with a clear plan which places a high priority on the establishment of permanent goals In Broome - the current situation with portable goals is not workable and does not allow for the continued growth and popularity of soccer.	Gemma Acland	Member of soccer association	Broome Soccer Association	The need for permanent soccer goals at BRAC was identified by the consultant as a high priority.	That the submission be noted and the soccer goals returned to a high priority project. Minimal financial impact as a low cost item.
29/11/2018	Feedback on item 10 (priority project listing) - Installation of permanent soccer goals.	I have been involved with soccer for the last six years and have thoroughly enjoyed the sport and community. I am very disappointed to see fixed soccer goals have become a low priority. I would urge you to reconsider that stance. There are no dedicated soccer facilities, even though our junior soccer participation is among the biggest in Australia! Fixed goals are something all can enjoy, whether official matches or families having a kick around. Broome needs fixed soccer goals!	Natasha Mavec	Member of soccer association	Broome Soccer Association	The need for permanent soccer goals at BRAC was identified by the consultant as a high priority.	That the submission be noted and the soccer goals returned to a high priority project. Minimal financial impact as a low cost item.
29/11/2018	Circus and dance does not seem to be a focus within the report.	The new development for Sports at the BRAC, leaves the Arts, dance and circus a little behind. Both my girls have done circus for over 3 years now and have grown with confidence, talent and fitness. The class promotes all of these skills and more, focusing on good health mentally and physically. It's a shame facilities aren't accommodating these activities in Broome as it represents an awful lot of kids.	Fiona Black	Parent	N/A	The need to find a home for circus is mentioned in 9.3.6. This section states that as sport grows there will need to be consideration for an alternative home for circus as the current operation of the group out of BRAC is restrictive to their activities as well as other sports. This is similar to developing situation with gymnastics at the Broome Senior High School.	That item 9.3.6 be amended to include the need to assist gymnastics in finding a location to operate from in a facility that better fits their needs. Potential for co location in a separate external facility.

29/11/2018	Feedback on item 10 (priority project listing) - Installation of permanent soccer goals.	After reading the draft plans for the upgrades for the recreation BRAC area I believe that the Soccer has been over looked as a priority. Facts: Broome Soccer is the number 1 activity for boys and equal 4th for girls Broome Soccer's members came in at close to 500 Broome's Soccer came in participation / membership as one of the 6 activities that were significantly higher than the national average. Broome Soccer is great for all ages and teenagers, soccer was played 3 out of 4 school terms, which is more than other sports that only go for a term or term and a half. Please reconsider moving fixed goals for soccer to a high priority with permanent playing ground. Broome Soccer is growing with this year sending teams to both Port Hedland and Perth. Also, several high school students were picked to play overseas. With access to an oval designated for soccer they could continue to grow and train more often. Please consider moving this from a low priority to HIGH priority.	Tammy Scholte	Parent	N/A	The need for permanent soccer goals at BRAC was identified by the consultant as a high priority.	That the submission be noted and the soccer goals returned to a high priority project. Minimal financial impact as a low cost item.
29/11/2018	1.3.10 Squash courts/multipurpose space	The new plans look great. I can't wait to visit Broome and play on the new squash courts. I love coming to the Broome Open. It has a great atmosphere and draws crowds from all over the state. With more squash courts on the horizon this will be able to boost the numbers for tournaments, and visitors to beautiful Broome.	Lisa Christou	N/A	N/A	Building three new squash courts is listed as a high priority in the Sport and Recreation Plan.	That the submission be noted and the squash/multipurpose space remain as a high priority item.
28/11/2018	Feedback on item 10 (priority project listing) - Installation of permanent soccer goals.	Requesting installation of permanent soccer goals at BRAC be included as a high priority rather than low. There are no fixed goals in Broome despite the sport being amongst the highest participated. Portable goals carry risks when transporting both to people and the goals themselves, cost more to buy and maintain, and encourages unauthorised use.	Tim Gray	Youth/Junior Coordinator	Broome Soccer Association	The need for permanent soccer goals at BRAC was identified by the consultant as a high priority.	That the submission be noted and the soccer goals returned to a high priority project. Minimal financial impact as a low cost item.
28/11/2018	1.3.10 Squash courts/multipurpose space	Supportive of building three new courts in Broome to allow Broome squash tournaments to grow by inviting more of Bunbury Squash Club members to attend.	Jamie Herring	Club Captain	Bunbury Squash Club	Building three new squash courts is listed as a high priority in the Sport and Recreation Plan.	That the submission be noted and the squash/multipurpose space remain as a high priority item.
27/11/2018	1.3.10 Squash courts/multipurpose space	Broome Squash Club hope that the Shire sees fit to invest in three additional multipurpose courts at BRAC through the 2018-21 period and is ready to work with the Shire to see it come to fruition.  Squash is currently operating at capacity due to the limited number of courts available. Extending into other nights would take away from the social aspect. But the Shire could generate more income from more social use. Extended courts would encourage more invitational tournaments (triple the participation numbers) The multi purpose aspect would also encourage other sports to be played at BRAC.			Broome Squash Club	Building three new squash courts is listed as a high priority in the Sport and Recreation Plan.	That the submission be noted and the squash/multipurpose space remain as a high priority item.
23/11/2018	Fans in the indoor stadium	Including large fans in the indoor stadium to assist with air flow for sport and recreation activities, but also when being used as a cyclone shelter. This would assist with reducing humidity level, reduce slipping hazards due to sweat and be an economical solution.	Nick Linton	Director	BROOME BASKETBALL ACADEMY	Including fans in the indoor stadium would benefit both sport and recreation participants and members of the public seeking shelter during cyclones.	That the submission be noted. Adjustable backboards to be included for junior use, but not to update the ring type. Remain at a base level of equipment.

23/11/2018	Feedback on item 10 (priority project listing) - Installation of height adjustable backboards and new rings.	A more modern backboard and ring allows for junior competitions to be played more easily and assists in raising the skill level, as well as making logistics of junior set up easier. More modern rings would reduce the risk of injury from dunking, and assist in developing skills.				Installing adjustable backboards would provide a base level service provision to junior basketballers. Addition of more modern rings and backboards would be viewed as over an above the basic level of servicing for the sport.	Include the fan as high priority item and seek potential for funds from emergency type funding programs for shelter seekers comfort in the cyclone shelter.
21/11/2018	1.3.15 Pool Clubroom/meeting room/creche	Supportive of the development of this area. Club is committed to contributing financially to the construction/fit out of the space. Keen to utilise the space for club meetings/land based training/recording station for key events, and to showcase trophies and club history.	Naomi Findlay	President	BROOME BARRACUDAS SWIMMING CLUB	The clubroom area is listed as a high priority. Contribution from the Broome Barracudas would be viewed favourably.	That the submission be noted, and the club/meeting/creche space on pool deck remain as a high priority project.
21/11/2018	1.3.10 Squash courts/multipurpose space	Supportive of building three new courts in Broome. Would increase club membership and opportunity to host larger tournaments up to 160 people from across WA and interstate.	Glenn Bridgeman	Club Captain	BROOME SQUASH CLUB	Building three new squash courts is listed as a high priority in the Sport and Recreation Plan.	That the submission be noted and the squash/multipurpose space remain as a high priority item.
17/11/2018	1.3.10 Squash courts/multipurpose space	Supportive of building three new courts in Broome as it provides opportunity for increased participation in squash and sport from juniors to seniors ages. The new courts can broaden sport and activity options for people in Broome.	Andrew Waters	Committee/Lif e member	BROOME SQUASH CLUB	Building three new squash courts is listed as a high priority in the Sport and Recreation Plan.	That the submission be noted and the squash/multipurpose space remain as a high priority item.
20/11/2018	1.3.10 Squash courts/multipurpose space	Supportive of building three new courts in Broome. Would increase the potential for both primary and high schools to use the area for classes/lessons. The club would increase opportunity to run effective coaching programs in conjunction with schools in the area.	Chris Migliore	Physical Education specialist	ROEBUCK PRIMARY SCHOOL	Building three new squash courts is listed as a high priority in the Sport and Recreation Plan.	That the submission be noted and the squash/multipurpose space remain as a high priority item.
20/11/2018	1.3.10 Squash courts/multipurpose space	Supportive of building three new courts	Catriona Webster	Member	BROOME SQUASH CLUB	Building three new squash courts is listed as a high priority in the Sport and Recreation Plan.	That the submission be noted and the squash/multipurpose space remain as a high priority item.
	Cycle and footpath connections	No strategies around increasing cycle or pathways around town.				The Shire of Broome's Recreation Trails Masterplan covers this information.	That the submission be noted.
19/11/2018	Sailing Club clubhouse and boat storage facility	Seeking inclusion of a Sailing Club clubhouse and storage facility adjacent to a suitable launch area in the Sport and Recreation Plan and the Shire of Broome Corporate Business plan.	Phil Cox	Commodore	BROOME SAILING CLUB	A Sailing Clubhouse falls under Category Three in the proposed Philosophy and rationale; Sport Specific Clubs. Support could be provided should Council see an economic benefit for the Shire and community.	That the submission be noted and the Shire continue to assist with supporting the sailing club to lease some land at the turf club.
13/11/2018	1.3.10 Squash courts/multipurpose space	I have just read with great interest the Broome Sport and Recreation Masterplan. I was very excited to read about the proposed construction of 3 new squash courts. Having visited Broome for the past 3 years with my family by invitation to compete in the Broome Invitational squash tournament I was so impressed with the place I bought my extended family up recently for a 2 week holiday. As the owner of 3 squash centres in Perth I have told many or our members about how good the event is. With only 2 courts players can currently only play by invitation from the Broome Squash Club and entrants have been limited to 64. An additional 3 courts would allow 160 entrants for the event and I am confident I could bring at least 40-50 additional players from my clubs alone to Broome for this tournament.	Kane Fasolo	N/A	Squash World	Building three new squash courts is listed as a high priority in the Sport and Recreation Plan.	That the submission be noted and the squash/multipurpose space remain as a high priority item.

12/11/2018	1.3.10 Squash courts/multipurpose space	The Broome Fitness Centre at BRAC will be an excellent addition. The new squash courts, gym/fitness training area, improved change rooms and additional storage areas will make it a 5 star facility.  Broome Squash Club attracts a large number of players and supporters. It runs a junior and senior competition, with two season in the year. The increased court space, would allow the club to have more teams involved. There are already over 100 players attached to the club. It would be wonderful for the club to have the resources that will see the club grow in the future.  The Squash Club also runs an invitational each year, attracting players from all around the state. This is a wonderful event that not only allows the Broome club to network and build strong, lasting relationships with other clubs, it also show cases Broome. Many players form outside of Broome, bring their families and spend a few extra days either side of the invitational to see the natural splendour of Broome, taste the delights of the region and enjoy experiences that can only be had here.	Jodi Kirk	N/A	Broome Squash Club	Building three new squash courts is listed as a high priority in the Sport and Recreation Plan.	That the submission be noted and the squash/multipurpose space remain as a high priority item.
12/11/2018	1.3.10 Squash courts/multipurpose space	I'm writing to show support for the building of new multi purpose air conditioned courts at BRAC as part of the Sport And Rec Shire plan.  These courts can be used for squash, badminton, table tennis, fitness classes, personal training sessions, crèche etc in air conditioned comfort.	Lana Reed	Member	Broome Squash Club	Building three new squash courts is listed as a high priority in the Sport and Recreation Plan.	That the submission be noted and the squash/multipurpose space remain as a high priority item.
11/11/2018	1.3.10 Squash courts/multipurpose space	Great news! This is a long overdue and very necessary development for the Broome Squash Club.  I look forward to locking in my annual family holiday to incorporate the 'Broome Invitational' squash tournament each May for many years to come.	Derek Nunn	N/A	N/A	Building three new squash courts is listed as a high priority in the Sport and Recreation Plan.	That the submission be noted and the squash/multipurpose space remain as a high priority item.
09/11/2018	Early years/ Children's strategy.	Need to include reference to the role of playgroups, toy libraries and other childhood settings to meet the needs of younger children and their parents.  And support the inclusion of projects that include providing for the early years age range such as creche facilities and playgrounds.	Susan Burton	Manager of Community Engagement and policy.	Department of Communities	There is no reference to early childhood years within the Sport and Recreation document but projects that relate to that age range include the high priority projects of pool playground, courts playground, creche facilities on pool deck.	That the submission be noted and the creche and playground projects identified be retained as high priorities.
08/11/2018	1.3.10 Squash courts/multipurpose space	I am writing to express my support for the Sport and Recreation Masterplan and the proposal to develop 3 Squash Courts at BRAC. I am a Life Member at Broome Squash Club and have watched it blossom over the years. Through hard work, dedicated volunteers and commitment we are at full capacity and unable to expand any further with our pennant, juniors and regional tournaments. Having 3 more courts will be beneficial in many ways.	Sue Urquhart	Committee member	Broome Squash Club	Building three new squash courts is listed as a high priority in the Sport and Recreation Plan.	That the submission be noted and the squash/multipurpose space remain as a high priority item.
08/11/2018	1.3.10 Squash courts/multipurpose space	Supportive of building three new courts in Broome as it could expand squash and bring more people to Broome.	Santosa Guzzetta	N/A	Member of public	Building three new squash courts is listed as a high priority in the Sport and Recreation Plan.	That the submission be noted and the squash/multipurpose space remain as a high priority item.
